Omni has established a solid reputation as a trustworthy manufacturer and supplier of office furniture since 2004. Specializing in high-quality customizable furniture solutions, our extensive product range includes chairs, desks, workstations, space division, storage, and accessories such as monitor arms and power solutions.

Production Bases and Distribution Network

Omni has developed a deep understanding of premium office furniture through two decades of focused exploration, design, and manufacturing. As one of the few companies that skillfully combine a variety of traditional techniques such as plastic, metal, wood, surface finishing, rapid prototyping, and machining, We have firmly established ourselves in the industry. Our clients trust us for our rigorous quality control measures, reliable supply chain, meticulous focus on details, and efficient delivery times.

Our Story

2003

During his visit to the United States, Henry Zhang, the owner of Omni, met Mr. Glenn Steil, an experienced professional in the office furniture industry. Their discussion led to a collaboration project to develop American-style office furniture in China. This unexpected opportunity not only sparked Henry's aspirations but also paved the way for his future ventures in the office furniture sector.

2004

Jiangsu Omni Industrial Co., Ltd. (Omni) has been established in Yangzhou, China. We specialize in manufacturing system-based office furniture that integrates elements of American and European styles.

2005

We designed and developed our first-generation product, the Steel-Wood Panel System. This innovative product quickly gained popularity in the US market. Our strategic partnerships with US office furniture distributors further strengthened our presence and broadened our reach in this competitive industry.

2008

We introduced our second-generation product, the Tile Panel System, featuring a collection of stacked steel panels. This system continues to be popular in both the European and US markets.

2009

We acquired over 200 acres of land in Texas, US. At the same year, we established the North America Product Research and Development Center and Customer Service Center known as OMNIMAX USA.

2011

Our research and development team once again pushed boundaries with the creation of the sleek Panel Desking Plus series. This collection was specifically designed to meet the evolving needs of contemporary office spaces where efficiency and flexibility are crucial.

2014

We have made a significant impact with the launch of the innovative Magick Bench collection, which showcases stylish aesthetics, original design, and cutting-edge craftsmanship.

2015

Understanding the importance of power and connectivity in today's digital age, we started providing integrated power solutions for modern work environments, ensuring people do their best work in the places where work happens. This dedication has led to the establishment of Omni Electrical, committed to delivering professional office power access products.

2016

Recognizing the worldwide need for enhanced health and safety standards in techbased office furniture, we took a courageous move by establishing Omni Technology focused on creating power management systems for such furniture. This move ensures that Omni continues to lead in providing secure and efficient solutions to our clients.

2019

We expanded our development by introducing the Kupp series of seating products, specifically designed to meet the growing market demand for shared offices. This addition enhances Omni's comprehensive solutions for system office furniture, leveraging unique plywood technology.

2020

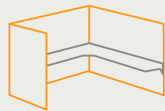

We have established the Intelligent Manufacturing Center in Rugao, Nantong, with the goal of focusing on technological progress and enhancing production and manufacturing capabilities.

2023

We have successfully expanded our operations in Shenzhen by establishing Omni Technology (Shenzhen) Co., Ltd. This strategic move will significantly enhance our production and research capabilities. Moreover, we are actively exploring new markets to improve accessibility and services for a wider customer base.

Panel Systems

The process of creation is often a collaborative effort, but there are times when we desire some separation.

Today's panel-based workstations offer users a variety of options for posture and privacy, with easy access to power and data as needed. Sit-stand options help establish boundaries while maintaining connectivity, while X-RAIL and AO2 panels create shielded areas and semi-enclosed spaces for more focused work or for added privacy.

HA panel system is a groundbreaking solution designed to enhance productivity and well-being in fast-paced, collaborative work environments. Its innovative design allows for easy movement and adjustment of work surfaces to accommodate various postures.

By incorporating the lifting columns within the panel frame, HA panel system maximizes workspace usage, ultimately promoting employee well-being.

HA panel's intuitive touch controllers allow users to effortlessly adjust the work surface to their preferred height, accommodating a variety of postures.

Comes equipped with casters that allow for easy movement.
HA moves with you and your work. It's mobile, yet stable.

Compatible with the majority of panel systems available in the market, allows for flexible creation of various styles and configurations, making it distinctly yours.

Our work environment has evolved significantly in the past decade, and this trend is set to continue. The modern workplace requires a diverse range of applications to cater to different types of workers and tasks. Whether it's individual work or collaborative projects, X-RAIL provides a variety of tools to address these challenges today and adapt to future needs.

X-RAIL was designed to seamlessly integrate and complement a variety of other Omni products. Its simple design allows you to design a variety of spaces that blend together, both aesthetically and functionally.

Power supply can be flexibly installed, and it is UL safety certified.

Provides independent and adaptable workstation combinations, while maintaining connectivity.

Customizable workstation styles, metal frame paired with a variety of panels like soundproofing material, veneer, etc., to meet diverse needs.

Modular components allow for the extension of 120-degree irregular workstations to accommodate employee work areas, meeting rooms, and other small partition requirements.

AO2 panels have been designed to create spaces within an open floor plan, enabling organizations to strike a balance between privacy and collaboration.

They cater to a wide range of applications and material options. Additionally, these panels offer strong technology support and long-term flexibility to adapt to changing needs.

Metal frame paired with wooden panels and external fabric for color variety; moisture-resistant and heat-resistant.

Standalone private workstations that offer privacy in close proximity.

Various planning and material options provide the opportunity to customize the look of any space. Glass screens can be stacked to allow access to natural light.

UL LISTED overall safety certification, compliant with Class A fire resistance rating.

AO2 panels make it easy to create private spaces that can support impromptu discussions and private meetings.

Experience a casual workspace with a lounge sofa and small table, featuring built-in power sockets for uninterrupted communication and collaboration, ensuring a clutter-free environment.

Benching

In today's dynamic workplace, the fluidity of individuals and teams is essential for facilitating the exchange of ideas and fostering innovation. Collaborative spaces that allow for both group contributions and focused work are crucial. Integrated benching settings address the need to facilitate information sharing and collaborative meetings without occupying a lot of floor space.

COBO

COBO offers a sleek, modern design with a durable steel frame and tapered legs for elegance and functionality. Its minimalist desktop layout promotes productivity and collaboration. Available in single and double station options.

COBO provides efficient power and cable management for workers' and mobile technologies. Users can choose between base or ceiling power sources in single circuit or four-circuit configurations.

Individual workers can tailor COBO benches and desks to their preferences with adjustable privacy screens, monitor arms, and desktop power strips.

Team members collaborate regularly but also require personal spaces and storage. COBO enhances organization while fostering a community environment for sharing information, answering questions, and quickly resolving problems.

COBO features a flexible and minimalist design that provides a clean surface and easy access to power, making it ideal for collaborative spaces and meeting rooms.

Horseshoe leg design provides stability and makes a small space feel bigger.

EASY

EASY ensures an elegant aesthetic throughout the floor plan, seamlessly transitioning from open spaces to private offices. This flexibility allows for efficient resource distribution to cater to a variety of individual needs, regardless of how frequently they may change.

MAGICK

MAGICK is designed to adapt to any work style over time. Its modular design allows for versatile arrangements, making it a practical choice for various applications.

Crafted from durable aluminum alloy casting, MAGICK's thicker legs enhance load-bearing capacity for stability and reliability.

The sliding tabletop simplifies access to and management of the power cords underneath.

Providing private space for individual workers, screens reduce distractions, allowing for increased concentration.

FRAME A

Communal experiences are increasingly vital for work environments. FRAME A combines performance and design to create social and collaborative spaces, tailored for intimate, spontaneous gatherings in the modern workplace.

FRAME A offers a wide variety of options, ranging from long work desks and individual workstations to L-shaped and T-shaped configurations, as well as meeting tables, ensuring flexibility and adaptability in any workspace.

Height-Adjustable Desks

A company's success hinges on the wellness of its employees. A healthy work environment not only nurtures the workforce but also safeguards the company's most valuable asset - its people.

Omni's height-adjustable desks are designed to support employee wellbeing and foster a health conscious culture. These desks prioritize comfort and productivity, ultimately enhancing workplace efficiency and innovation.

SOLE height-adjustable desk is an ideal choice for individuals seeking to enhance their work dynamics in a home or small office setting. It offers an affordable and reliable solution with the essential features.

LINKER height-adjustable bench promotes healthy movement and accommodate individual preferences throughout the day, empowering teams to create dynamic workspaces.

Dual-sided benches enhance space utilization, and also create space for collaborative work.

Supports ergonomic tools such as desktop power strips, monitor arms, and screens.

Fit more people into the office without compromising their comfort with an efficient design.

Easily flipped to create more space for versatile areas, allowing seamless transitions between individual work, group discussions, presentations, and hands-on activities.

MULTI is a flip-top height-adjustable desk designed to accommodate various working styles. Its easy mobility and reconfiguration enable workers to seamlessly transition between different modes, interact with content, access power sources, and collaborate effectively. The versatility of MULTI encourages workers to stay motivated, creative, and engaged.

DOCKER power beam offers a flexible solution for creating light-scale space divisions with integrated power and data distribution. The beam supports screens for varying privacy levels. Combine it with either height-adjustable or fixed-height desks to establish a seamless and practical office layout.

Delivers convenient access to power and data throughout a space. The 8-wire design, with its modular and configurable setup accommodating 1 to 4 circuits, can easily be adjusted to meet California Title 24 power requirements.

Collaborative Tables

Dynamic work requires tools and solutions that facilitate brainstorming, agile-inspired activities, and keeping work visible. The Omni collaborative tables, MOVI and TRAINI, broaden the possibilities for versatile, easy-to-change work environments, empowering teams to create spaces that can be reconfigured as needed.

Tables

Collaborative Tables TRAINI

TRAINI flip-top table is designed to enhance the workplace with its easily nested, flexible, and responsive design. This table can be effortlessly flipped, moved, stowed, and rearranged simply and safely, ensuring smooth transitions between different modes of working and learning.

Table flips open or closed easily while remaining sturdy. It features silent and wear-resistant swivel casters with lock buckle for high load capacity.

With extension beam from 48" - 72" for easy dimension assessment.

Movi provides a sturdy, safe, and versatile table solution that enables users to smoothly switch between various modes, facilitating easy access to content, resources, and effective collaboration.

Perfectly suitable for training rooms, conference areas, or educational settings.

Occasional Tables

The occasional tables are unique collaborative pieces that can bring a modern flair to homes, workplaces, hotels, and busy environments, emanating a sense of warmth and tranquility.

Sturdy and minimalist, the design harmonizes spaces and users, offering exceptional flexibility. The singular central base is BIFMA certified.

Power modules support connectivity on the tabletop into an under-table central trough, with cables disappearing through hollow legs.

NEXUS table's elegant and modern design makes it a versatile complement to any environment. Its sturdy tops are securely attached to a customizable four-star base, serving as a focal point in meeting rooms, collaborative spaces, restaurants, and residences.

SELLA 094-103

Conference and Guest Chairs
KUPP 104-109

Conference and Guest Chairs
CREO 110-115

SELLA

"Increasingly, task chairs have looked like machines rather than pieces of furniture. The soft, organic forms of the chair back and arms are an antidote to this. The shape and flow of the form are intended to make the chair feel like one piece, not a collection of mechanical parts. This, and the simple overall form, is intended to give a more human feel to the task chair."

SELLA PRO is a durable task chair tailored for long hours of intensive sitting, ideal for high-end business professionals. Finely crafted with die-cast aluminum bases for enhanced texture and smoother lines, SELLA PRO adds sophistication, intelligent features, and calming comfort to any workspace.

Armrests adjust in four dimensions – height, width, depth, and pivot – to provide optimal neck and shoulder support, ensuring proper posture. They align with the work surface at any reclining angle, enhancing focus and comfort.

The adaptable design of SELLA PRO seamlessly fits into any setting, be it a conference room, personal workstation, or home office.

SELLA automatically adjusts to mimic natural spine movement, contouring to the user's back, ensuring continuous lower back support as you move in your chair.

Seat depth, seat height, back tension, and height tension can be adjusted to accommodate different body shapes for long-term comfort.

Accommodates the largest postures by offering comprehensive support through its backrest, seat, and armrests.

KUPP

Finely crafted and distinctive by design, KUPP elegantly balances luxury, comfort, and function for guest and conference seating.

Single-shell design featuring wood veneer molded into elegant curves.

Ergonomic pitched back, along with swivel base and open arms, allows for easy turning and promotes movements that keep you engaged.

Mix and match to create a personalized chair with various upholstery, colors, materials, and bases. KUPP offers versatile solutions for different applications, from conference rooms to welcoming guest and social environments.

CREO

CREO is a multipurpose stacking chair with an interlocking frame that adds warmth and character to any space. It merges the sleek curves of a precision molded seat shell with the sculptural elegance of solid legs, making it ideal for populated spaces like waiting areas, training rooms, and cafes.

Seating

Conference and Guest Chairs · CREO

Variety in style and height allows for freedom of expression: standard frame linking chairs, sled base chairs, cafeteria chairs, bar height stools, and more.

The innovative interlocking frame allows stacking up to 8 chairs for easy access and convenient storage when not in use.

Power Access

X.LINKER is an advanced power system designed to streamline and distribute power in workspaces. It provides a seamless solution for connecting power components above desks or tables.

Omni power strips transform every desk into an inviting space for connecting devices, with a combination of USB-C, USB-A, and standard power outlets available in various country standards such as US, UK, EU, CN, and AU.

In today's modern workplace, employees heavily rely on technology to carry out tasks efficiently. The scarcity of outlets hampers technology support in rooms and collaborative spaces, prompting employees to seek inconvenient, uncomfortable locations to plug in. Omni's power solutions address this pain point effectively.

POWER LINKER provides power to any space, be it in proximity to furniture, within a lounge setting, café, or touchdown area, thereby optimizing the use of real estate.

Storage

Lack of organization leads to time wasted in cluttered spaces as workers search for necessary items. By providing easy access to tools and personal storage, employees can optimize their workspace and productivity. Omni storage solutions offer various sizes and designs to cater to the diverse needs of workers, accommodating items like bags, mobile devices, and documents effectively.

Built with a sturdy load-bearing frame for outstanding durability, ARCH is equipped with a press-to-release rebound rail system for easy drawer access with a gentle push.
